

EDITORIAL

Translation by
Gordon Leonard Symons

Dear readers,

You will have noticed that the genius of Leonardo da Vinci has been entering impetuously into the collective conscious/unconscious during the five hundred years since his death, which is why we have dedicated the cover of our magazine to him.

Moreover, the 32nd National Congress 2019 of the Institute of Psychosynthesis, which will be held in Ancona, has human potential as its theme.

And human potential is a resource whose expression is coming through in all areas: The Assagioli Archive shows us and makes us listen to Roberto's heart through his Diaries and his valuable suggestions. The Board of Directors is setting the foundations for the next International Congress A from 16 to 19 September 2021 in Florence entitled Challenge for a new civilization – Responsible for the Future.

From the October issue, Donatella Randazzo will open a new column to weave a network of contacts that unites the Psychosynthesis world outside Italy; the Scientific Committee is renewed with the contribution of Pier Maria Bonacina and members are constantly receiving offers of interesting and useful articles.

Leonardo, who like Assagioli with his assagiolini (little notes), always had a notebook on which to note down an intuition, would tell us: "Just as iron rusts through disuse, so inaction wastes the intellect and with foresight, he who had not been able to fly: Once you have known the flight you will walk on the ground looking at the sky, because there you have been and there you will want to return."

I wish you good reading and I look forward with the editors to your contributions and your notices.

Patrizia Bonacina
