

EDITORIAL

Dear readers,

*What excitement there is in the world of Psychosynthesis! Meetings at Casa Assagioli, conferences in the world and the Futuro at the International Congress in 2016. Contacts that are being woven among all continents. In this regard I want to mention the Round Table of March 27, at the Institute, including readings of the diagram of the Egg Diagram, as reported in the previous issue of the magazine. During the meeting interventions emerged that have opened new questions and new researches. We think you will be pleased by the decision to dedicate a section of the magazine to the event, also thanks for the kindness of the speakers who sent us the texts of their speeches. Their contributions will certainly be a driving force for original and innovative incentives that will lead us in a new way to Congress in 2016 and to constructive debates. Research is one of the vital forces of humanity and has as its primary objective the advancement of knowledge and understanding of the relationships among the different variables. During the meeting of the collaborators in Florence, in addition to the discovery of the renovated Giardino, For the first time after 1974, the President opened a library containing abundant and several unpublished writings of Assagioli, In this atmosphere the hand-written notes of the founder of the Institute have been put on the Net, thanks to the careful and accurate, silent and constant work of tenacious members. Sentences, thoughts, insights both in Italian and English can be easily retrieved and viewed to become creative stimuli:
www.archivioassagioli.org.
A new horizon amongst small sheets.*
